

# Product Data Sheet **Zehek-F9W**

# For Wet Method Fluorescent Magnetic Particle Inspection

### **DESCRIPTION**

ZChek-F9W is a green-colored water based Magnetic Particle Powder designed to be fluorescing bright green under UV Light. ZChek-F9W consists of high sensitivity particles for detection of very fine discontinuities in Ferromagnetic materials. Using the state-of-the-art encapsulation technology, ZChek-F9W is manufactured to exhibit excellent properties (High permeability, low retentivity, high mobility and optimum particle distribution) required for high sensitive fluorescent MPI process. Special additives in F9W provide excellent particle mobility in water medium and avoid flash rusting of parts.

# **CONFORMANCE / APPROVALS**

- ASME B & PV Code, Sec V
- EN ISO 9934-2
- AMS 3044
- ASTM E709
- ASTM E1444/ E1444M

### **FEATURES**

- Fluorescent Bright Indication under UV Light.
- Provides Excellent Discontinuities Definition.
- Sharp Indication with Minimal Background.

# ZCINCK-F9W Water Based Land and the second and the

### **APPLICATIONS**

ZChek-F9W is designed to detect medium to fine surface and slightly subsurface discontinuities like inclusions, seams, shrink cracks, tears, laps, flakes, welding defects, grinding cracks, quenching cracks, and fatigue cracks in raw forgings, castings (during preliminary stage), auto components (machining cracks, grinding cracks, heat treatment cracks), fabrication, steel making (billets and bars), surface transportation, oil and gas and all applications which involve further processing like machining and oiling.

### TYPICAL PROPERTIES

Color Under White Light	Green
Color Under Black Light	Green Fluorescence
Mean Particle Size	10 Microns
Particle Size Range	1-16 Microns
Sensitivity	7 (Ketos Ring)
Max. Operating Temperature	48.9 ° C Maximum
Settling Volume	0.05 – 0.15 ml

# Product Data Sheet **ZChek-F9W**

### **DIRECTIONS FOR USE**

- Use F9W at 10.75 11 gram per liter. Run the pump for 15 minutes before testing.
- Check the concentration before use at least once each shift using centrifuge tube.
- Parts should be clean and dry prior to testing.
- The bath must be under continuous agitation
- Using the wet continuous method, the bath is applied to all surfaces of the part. The instant the bath stream is removed from the part the magnetizing current is applied
- Follow ASTM E1444 for the further processing.

- 1 Kg pack Part #224013
- 1 Pound pack Part #224010
- 5 Kg pack Part #224015

Information on Health & Safety is made available through material safety data sheets and the same can be reviewed through the company's website www.zchem.in.

### **STORAGE & SHELF LIFE**

Bulk packing has a Shelf Life of 5 Years, if unopened and stored as per ZChem recommendations.
